PIETER TANOTO

Mobile Developer

(+62) 877-4821-5683 | Medan, Indonesia | pietertanoto01@gmail.com
Linkedin : linkedin.com/in/pieter-tanoto | Github : github.com/PieByter | Portfolio : pietertanoto.vercel.app

Computer Science graduate from Universitas Sumatera Utara with a strong foundation in Android development using Kotlin and Java. Experienced in building mobile applications with clean architecture, REST API integration, and AI/ML features including on-device inference with TensorFlow Lite and object detection with YOLOv11. Familiar with the full mobile development lifecycle from requirement gathering to APK deployment. A fast learner with a problem-solving mindset, eager to contribute as an Android Developer in building reliable and user-focused mobile applications.

WORK EXPERIENCES

PT. Sumatra Tobacco Trading Company (STTC) — Medan, North Sumatra
Web Programmer — Jul 2025 – Dec 2026

- Supported development of internal web systems using Laravel across POS, vehicle sales, and warehouse management modules
- Collaborated with senior developers to implement and improve system features
- Assisted in requirement analysis and translated user needs into system functionality
- Engaged with internal users to understand business processes and improve usability
- Performed testing and debugging to ensure system reliability and operational alignment

BPJS Ketenagakerjaan (BPJAMSOSTEK) — South Jakarta, DKI Jakarta
IT Support & AI Developer Internship — Sep 2024 – Des 2024

- Developed AI-based chatbot solutions (internal and external) with RAG-based architecture to support business operations
- Conducted UAT to validate chatbot systems against business requirements
- Handled system troubleshooting, incident resolution, and performance improvement initiatives
- Collaborated in an Agile Scrum environment to manage tasks, timelines, and iterative delivery
- Documented system workflows, technical processes, and configurations for knowledge sharing

EDUCATION

UNIVERSITY OF NORTH SUMATRA — Medan, North Sumatra
Bachelor's Degree in Computer Science (GPA: 3.94/4.00) — Aug 2021 – Aug 2025

PROJECTS

Final Year Project : LaporBang Mobile Apps — Medan, North Sumatra
Full Stack Developer (AI, Android & Backend) — Feb 2025 – Jun 2025

- Architected a full-stack solution featuring an Express.js backend and a robust mobile application.
- Fine-tuned YOLOv11 for real-time pothole detection and U-Net for precise damage segmentation.
- Optimized models via TensorFlow Lite for low-latency inference on Android devices.
- Managed end-to-end development, including geolocation services and real-time data synchronization.

BPJAMSOSTEK : AI Chatbot Ecosystem — South Jakarta, DKI Jakarta
IT Support & AI Developer — Sep 2024 – Dec 2024

- Developed a chatbot interface using Python and Streamlit for accurate, context-aware information.
- Implemented RAG using LangChain with ChatGPT for reasoning and Qwen via Ollama for local processing.
- Engineered system prompts and context-handling logic to ensure fast response times and reliable outputs.
- Secured the environment with JavaScript-based validation and API security protocols to protect data privacy.

BANGKIT Academy 2024 Batch 1 : Capstone Project (Auxilium) Medan, North Sumatra
Mobile Android Developer Feb 2024 – Jul 2024

- Managed the full SDLC of Auxilium, a smartphone recommendation app, from UI design to Android deployment.
- Engineered the integration between mobile client and backend for seamless API communication.
- Led technical execution within a one-month cycle, ensuring all milestones were met on time.
- Communicated technical solutions professionally in English during presentations and reviews.

Techy Trashker : Waste Management App Medan, North Sumatra
IT Support & Concept Researcher Mei 2023 – Aug 2023

- Prototyped waste collection scheduling system for Medan municipal operations
- Designed mobile interface mockups for waste pickup requests and route optimization
- Won Favourite Team Award among 50+ competing teams for innovation and presentation

ACHIEVEMENTS

Favourite Team Award Winner, Fordigi BUMN Hackathon Challenge Medan, North Sumatra
IT Support & Concept Researcher Aug 2023

- Demonstrated proficiency in IT support and contributed valuable skills in conceptual research.
- Spearheaded the development of Techy Trashker, an innovative solution for efficient waste management in Medan City.

SKILLS

- Mobile Development: Android (Kotlin, Java), Jetpack Compose, XML Layout, Clean Architecture, MVVM, Room, Hilt, Firebase, REST API integration, APK distribution
- AI/ML Integration: TensorFlow Lite, YOLOv11, RAG, LangChain, prompt engineering
- Backend & Database: Laravel, Express.js, MySQL, PostgreSQL, MongoDB, Firebase (Firestore/Realtime Database), RESTful API design
- Testing & Tools: Manual testing, API testing (Postman), Git, GitHub, Docker (basic), Jira, Trello
- Automation & Others: n8n (basic workflow automation), Python, JavaScript
- Languages: Indonesian (Native), Hokkien (Native), English (TOEFL ITP: 530), Mandarin (Limited)
